

Technology in the cockpit: ADS-B, tablet-based navigation and more...

Today's modern general aviation cockpits have more computers than ... well, they have a lot! We'll talk about the most interesting and typical aides to situational awareness, and how to keep the aides from distracting the pilot from his principal duty: flying the airplane. Learn about ADS-B, tablet-based navigation apps and more.

Directions: Off Boy Scout Drive across from Page Commons in Fort Myers, Florida. Second floor conference room.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
